Aputure launches lens adapter based on LC-Tec's PolarView® filter

LC-Tec Display AB's partner Aputure (China) has recently launched an innovative lens adapter based on LC-Tec's patented ND filter PolarView®. ND (neutral density) filters are of great importance for certain creative photography and reduce the amount of light that reaches the camera sensor. The main customer benefit of LC-Tec's PolarView® filter is that the photographer with a single filter can obtain an in principle infinite number of gray levels. It is electronically controlled and the change from one level to another is very fast. The product is the first of its kind and is primarily aimed towards videographers. For additional product information, please visit: <https://store.aputure.com/products/dec-vari-nd-1>.

About LC-Tec

LC-Tec is a technology company specializing in optical components based on liquid crystal (LC) technology. Located in Borlänge, Sweden, the company has over 25 years' experience of designing and manufacturing a wide range of LC-based products, including optical shutters, variable ND filters, polarization modulators, and information displays. The facilities houses advanced electro-optical laboratories as well as a modern passive matrix LCD manufacturing line. LC-Tec is a publicly traded company, listed on the NGM Nordic MTF stock exchange market.
